30 December 1964

MEMORANDUM FOR: Acting Chief, Ground Systems Division/OEL

SUBJECT : [REDACTED]

25X1A

25X1A

1. [REDACTED] representative, called to say that thru discussions with [REDACTED] he believed that we would be interested in some work that [REDACTED] is doing at St. Paul in the application of nuclear molecular resonance to signal identification. It appears that [REDACTED] and the ORD people have asked for a proposal from [REDACTED] with the idea of sponsoring some of this work.

25X1A

2. [REDACTED] of ORD I believe has been briefed on work which [REDACTED] is doing in spherics. [REDACTED] is presently believed by [REDACTED] to be funding a "strange group" in this area. The St. Paul people, however, have made considerable progress in this field and have made an installation at Canaveral for precise weather control. [REDACTED] believes that we have possible applications which are non weather.
